EXPERIENCE

TinyMCE

Remote — Barcelona, Spain

Senior Software Engineer CURRENT

Oct 2021 – Present

- Built and maintained the customer portal enabling both sales-assisted and self-service customers to set up the TinyMCE editor, purchase premium plugins, and manage subscriptions and usage.
- Played a central role in migrating 500,000+ users from a legacy WooCommerce billing solution to Maxio (Chargify.js), introducing usage-based billing that significantly increased MRR; gathered requirements and communicated closely with stakeholders throughout.
- Contributed to usage-based billing for TinyMCE's new AI products, working on the billing side that consumed upstream usage data and turned it into customer charges.
- Developed team-wide AI development guidelines — covering code review, testing, and daily tooling — accelerating delivery across the team during a period of rapid AI adoption.
- Integrated Auth0-based social authentication and SSO, contributing to a 20% increase in user signups.
- Developed customer-facing editor usage tracking, building a data-rich frontend with interactive Highcharts visualizations to surface usage trends and quota consumption to customers.
- Served as the primary domain expert through a period of team turnover, maintaining business continuity and onboarding new teammates.
- Picked up PHP on demand to maintain WordPress/WooCommerce components.

React NestJS PostgreSQL Maxio / Chargify.js Auth0 WordPress WooCommerce AWS

INT Inc.

Remote — Houston, USA

Software Engineer

Jun 2019 – Oct 2021

- Contributed to GeoToolkit.js, an enterprise JavaScript library for geodata visualization — expanding support across major frameworks (React, Angular).
- Led development of the Developer Portal for product and documentation distribution, taking the project from pre-production through release and owning DevOps, development, and support; gathered requirements and aligned closely with stakeholders across product and business teams throughout.
- Worked on IVAAP SDK, a SaaS product integrating GeoToolkit.js for advanced 2D/3D subsurface data exploration — improving SDK simplicity and developer experience.

Intern

Apr 2019 – Jun 2019

- Delivered bug fixes and documentation improvements for GeoToolkit.js.
- Built a new feature enabling CSS-like syntax for styling, gaining experience with a large codebase and computer graphics concepts.

JavaScript Angular React NestJS PostgreSQL AWS

SKILLS

Languages	JavaScript, TypeScript, SQL, PHP
Frontend	React, Angular, HTML/CSS
Backend	NestJS, Node.js, PostgreSQL
Infrastructure	AWS, Docker, CI/CD, Git
Domains	Billing / Maxio, AI integration, SSO / Auth0, Data visualization, SDK development, Rich-text editing
Languages spoken	Russian (native), English (C1+)

EDUCATION

B.Sc. in Information Technology	2015 – 2019
Novosibirsk State University	
Business Oriented System Design Course & Certification	Credly badge
